## **Is-Gambling.com connecting the gambling world**

With this slogan the first Social network specially designed to meet global punters/gamblers needs, started just a few days ago. After a thorough period of developing, it was achieved to implement all features that are essential to a state of the art Social network. Now all gamblers can connect to each other and introduce themselves to the World.

The aim of IG is to connect all kinds of gambling fans and make them stronger as a community. To fulfil that aim the regulations are very open. Every user can very freely open own groups and decide which topic they might have. Another aim is to give smaller web pages the opportunity to attend to their visitors in a forum style without having to deal with the often vast technical effort to set it up themselves. Therefore, every webmaster is permitted to set up their own support group for their website. On top, they are completely free concerning advertisements (affiliate-links for example).

Gambling-companies are also welcome to launch their own group in order to have a unique and transparent contact with their customers.

No matter if Casino games or sport bets, IG wants to contribute to a more connected world even in this domain.

## **About Ruhrbet:**

Ruhrbet was originally founded as an offline bookie. Later, it developed to a service provider for gambling companies with an emphasis on oddscompelling for companies who want to outsource this sector, to react flexibly to the marked needs. A second domain of Ruhrbet became online marketing for the gambling sector. Here Ruhrbet is active with its own online appearances as well as serving as advertiser. Our customers are such renowned gambling sites as Flashcore.com and Wettsieger.com.
